Main Topic : Integration of new traits
/ into breeding program

Next week: Combine different traits into
             Aggregate Genotype (AG) (Gesamt-zucht-
                                        wert)
                ⇒ Using selection index
                   theory to get estimates
                   of AG

Recent Past :

    – Breeding programs (cattle) stable

    – In pigs : – Focus on growth
                    "   "   meat quality

              – Newer focus on
                feed intake (Futterauf-
                             nahme
              (Replacement for
              Feed conversion ratio)
                    Futtereffizienz kg Feed)
                                        / kg G

Current development :
